

# Series 63 ISO 15552 cylinders

Single and double-acting, magnetic, cushioned  
 ø 32, 40, 50, 63, 80, 100, 125 mm

The Series 63 pneumatic cylinders have been developed to guarantee high performance and versatility. Thanks to a new system of adjustable pneumatic cushioning, the cylinders can always guarantee the best regulation whilst significantly reducing noise caused by the impact of the piston on the end block.

Besides the standard version, which can be used in many sectors, specific solutions have been developed for applications such as food processing, agriculture, in tensioning, dosing systems and dancer arms for winding applications. There are also versions for demanding application environments, capable of withstanding extreme temperatures, corrosive atmospheres etc.

- » In compliance with the ISO 15552 standard
- » Weight reduced by 25%
- » Low noise
- » More accurate with fine regulation of cushioning
- » Flexibility and versatility

#### VERSIONS AVAILABLE:

- » Low friction
- » Uniform movement (low speed)

## Accessory to mount valves on the cylinder

The mounting sub-base Mod. PCV enables the valve or solenoid valve to be mounted directly on the cylinder, thus forming a compact unit to apply.

Make sure that the WW dimension of the valve to be mounted is smaller than the JJ cylinder dimension.
